## Professional Summary

Artificial Intelligence and Data Science graduate with six months of Data Science training and hands-on experience in Python, SQL, Power BI, Machine Learning, Deep Learning, and web development. Experienced in data analytics, customer segmentation, adaptive learning systems, and full-stack application development. Strong foundation in data analysis, visualization, databases, machine learning, and building practical data-driven solutions.

## Technical Skills

**Programming & Databases:** Python, SQL, Java, MongoDB, SQLite

**Data Analytics & Visualization:** Power BI, Microsoft Excel, Pandas, NumPy, Matplotlib, Seaborn, Data Analysis, Data Visualization

**AI & Machine Learning:** Machine Learning, Artificial Intelligence, Deep Learning, Generative AI, scikit-learn

**Web Development:** HTML, CSS, JavaScript, TypeScript, React, Node.js, Express.js, FastAPI

**Tools & Platforms:** Git, GitHub, VS Code, Google Colab, Jupyter Notebook

## Training & Experience

### Data Science Trainee

Jan 2026 – Jul 2026

*Besant Technologies, Velachery*

*Chennai, Tamil Nadu*

- Completed six months of Data Science training with practical exposure to Python, SQL, Microsoft Excel, Power BI, Machine Learning, Artificial Intelligence, and Deep Learning.
- Worked with data preparation, analysis, visualization, database querying, and analytical problem solving using Python and SQL.
- Used Power BI and Microsoft Excel to analyze structured data and present findings through reports and visualizations.

### Software Development Intern

Jul 2025 – Sep 2025

*VaultofCodes*

*Remote*

- Completed a two-month internship program covering AI & Prompt Engineering, Java Programming, Python Programming, and Web Development.
- Applied Python and Java programming fundamentals, web development concepts, and Artificial Intelligence techniques through practical tasks and project-based learning.

## Projects

### AI-Powered E-Commerce Customer Intelligence & Sales Analytics

GitHub

- Analyzed an e-commerce transactional dataset containing 541,909 records through data-quality auditing, cleaning, exploratory analysis, and business-focused sales analysis.
- Engineered Recency, Frequency, and Monetary (RFM) customer features and applied transformation, scaling, and K-Means clustering to profile 4,338 customers.
- Evaluated clustering solutions using inertia, silhouette score, cluster size, and stability, identifying two meaningful customer segments and translating analytical findings into business insights.

### Python Edition – Adaptive AI-Powered Interactive Learning Assistant

Live | GitHub

- Developed an interactive Python learning platform that adapts learning experiences according to learner performance.
- Implemented learner ability estimation, mastery tracking, placement assessment, quizzes, coding challenges, analytics, and an AI-assisted interactive coding environment.
- Built the platform using React, TypeScript, Node.js, Express.js, MongoDB, and JWT-based authentication.

### Renu's Collection – Full-Stack Fashion & Jewelry E-Commerce Platform

Live | GitHub

- Developed a responsive full-stack e-commerce platform for fashion and jewelry with customer-facing and administrative functionality.
- Implemented product and category management, inventory, wishlist, shopping cart, customization, checkout, order management, JWT authentication, Razorpay, and Cash on Delivery.
- Built the application using React, TypeScript, Vite, Node.js, Express.js, and MongoDB Atlas and deployed it using Render.

## Education

### B.Tech – Artificial Intelligence and Data Science

2022 – 2026

*Grace College of Engineering, Thoothukudi*

*Anna University*

## Certifications

**Data Fundamentals** – IBM SkillsBuild, Aug 2026 | **Artificial Intelligence Fundamentals** – IBM SkillsBuild, Jan 2026

**AWS Educate Machine Learning Foundations** – AWS, Jul 2025 | **MongoDB Basics for Students** – MongoDB, Aug 2025

**Explore Emerging Tech** – IBM SkillsBuild, Jul 2025
